Rise up...to a new level of Exhibiting with AIRlite™

Insta Worldwide Group

“Your Partner for Powerful Point of Contact Solutions Worldwide”
About
Welcome to a whole new level of exhibiting with the all new Airlite Fusion solution. It combines the speed of installation and convenience with flexibility in booth design. Airlite Fusion is a modular exhibit solution that finds its utility in trade show stands and other large format displays.

The various parts and accessory options offered with Airlite act as building blocks for creating a variety of experiential spaces. What’s more, after the show this standard tool free hardware can be dismantled and reused in yet another design configuration for a future show providing complete value for money to the end user.
Features

**Convenience**

Airlite promises to make exhibiting a peaceful experience. It has a completely tool free installation and packs in compact plastic cases. A complete 9 m² three walled booth packs in just two cases which can be easily shipped to the fairground by a standard forwarder.

**Branding**

Airlite uses fabric graphics that are easy to install, light weight and have low packaging volume. A 3m backwall includes a 4 ½ m² fabric banner that can make your brand stand out to the visitors. The various accessories such as wings and overlay panels provide additional branding opportunities.

**Unique Designs**

Airlite Fusion enables you to create unique space designs thanks to the myriad elements it has on offer. The bonded metal canopies and frosted acrylic canopy supports provide a capping edge to your booth. It uses eco friendly fabric graphics that give rise to a contemporary look to the booth.
**Utility**

Airlite Fusion applications vary from a 9 m² Exhibit booth that has three walls and is open on one side to a 30 m² trade show booth designed to cater to client needs such as AV presentation and product display. Inclusion of different Insta counters adds to the storage ability and design of the booth.

**Modularity**

Airlite Fusion has a standard catalog of banner bars that connect with an engineered connection to each other forming longer banner walls. These banner bars can also connect at 90° angle to form corners making it ideal to create different sized booth. The standard parts can be reconfigured for a future show thereby promising a good ROI to the user.

**Lighting**

Airlite Fusion has lighting options that can be used to either focus on specific zones of the booth or to create a specific mood in the booth. A set of LED track lights are used to focus predominantly on graphic banner, wings and header. In case of extra light requirement, LED arm lights can be easily attached to the banner bars.
12m² one side open booth

Three connected backwalls offer large branding spaces

Three trapezoidal headers provide high branding

Double edged wings provide a triangular form to the booth

Corner canopies with track lighting add illumination to the banner
